

FOOD RESCUE US

The Simple Solution to Ending Local Hunger and Food Waste

Product Manager

Job Title: Product Manager

Location: Norwalk, CT/ Remote

Time Commitment: Full Time

Salary: Commensurate with experience

About Food Rescue US: Food Rescue US is a nonprofit organization committed to reducing food waste and food insecurity in America. Using our proprietary app, we engage volunteers to transfer surplus fresh food from local businesses to social service agencies serving the food insecure. Since our founding in 2011, we have provided more than 73 million meals to food insecure individuals and families. Simultaneously, we have kept more than 95 million pounds of food out of landfills, thereby, reducing global emissions.

At Food Rescue US, the product manager must be passionate about solving the dual problems of food insecurity and food waste. The product manager is responsible for guaranteeing the success of the Food Rescue US technology platform. The ideal candidate is an extreme doer who is a product expert with a powerful capability to make strategic decisions based on market and competitor analyses. Prior to production, the product manager creates the roadmap to guide a product (or product enhancements) from conception through design and into wide release. The product manager bridges the gap among the different departments involved in successfully bringing the Food Rescue US application platform to market, including R&D, engineering, marketing, development, operations, and customer support.

Responsibilities and Objectives

- Drive the execution of all product lifecycle processes for products, including product research, market research, competitive analysis, planning, positioning, roadmap development, requirements development, and product launch
- Translate organization strategy into product strategy, including stakeholder value propositions and the mapping from strategy into specific product features. Create

product strategy documents that describe business cases, high-level use cases, technical requirements, revenue, and ROI.

- Translate product strategy into detailed requirements for prototype construction and final product development by engineering teams

Skills and Qualifications

- Bachelor's degree in product design or engineering, or equivalent industry experience
- Demonstrated experience in a dynamic product management role
- Proven experience overseeing all elements of the product development lifecycle
- Highly effective cross-functional team management
- Exceptional writing and editing skills combined with strong presentation and public speaking skills

How to Apply

To apply please email your resume along with your cover letter to [Melissa Spiesman](#), VP, National Site Director. If a cover letter is not submitted, candidates will not be considered.
